Senior Project Manager | Enterprise Platforms, SaaS Systems & Technology Delivery

Senior Project Manager delivering complex cross-functional initiatives across SaaS platforms, cloud systems, and enterprise technology environments. Known for driving structured delivery from planning through execution, managing risks and dependencies, and aligning stakeholders across large-scale enterprise systems.

PROGRAM LEADERSHIP HIGHLIGHTS

- Directed Workday hypercare program supporting ~25,000 employees and ~85 integrations, stabilizing enterprise HR/payroll operations during post-deployment rollout.
- Coordinated cross-functional delivery across ~20 engineers, ~20 analysts, and 15 Workday functional workstreams, managing dependencies and operational risks.
- Established hypercare governance structure including Jira intake system, daily triage calls (~50 participants), and executive reporting dashboards.

CORE COMPETENCIES

Project Lifecycle • Program Delivery • Stakeholder Engagement • Risk & Issue Management • Governance & Reporting • Dependency Management • Agile & Hybrid Delivery • Platform & SaaS Delivery

TECHNICAL SKILLS

SQL • JavaScript • Python • AWS (Lambda, DynamoDB) • API Integrations • Data & Process Flows

CERTIFICATIONS

PMP • CBAP • CSM • CSPO • AWS Cloud Practitioner • Salesforce Associate

TOOLS

Jira • Confluence • Azure DevOps • Excel • Microsoft Project • Microsoft Teams • SharePoint

PROFESSIONAL EXPERIENCE

McLane Company, Hybrid April 2025 – January 2026

Project Manager *(Role impacted by company layoff)*

- Coordinated resolution of ~4,000 hypercare issues within the first two months of Workday deployment, aligning engineering and HR teams to stabilize enterprise operations.
- Led PeopleSoft retirement during Workday migration, designing archival strategy for 10M+ payroll records and aligning legal, compliance, and payroll leadership.
- Directed delivery planning across 15 Workday functional workstreams, coordinating engineering, HR, and payroll stakeholders to manage risks and dependencies.

CHARLES RIVER LABORATORIES, Remote April 2023 – October 2024

Project Manager (Technical Program Lead)

- Delivered high-content biology analysis platform (Zeiss Arivis Pro) across 8 European research sites supporting ~75 scientists and ~$3M projected annual revenue growth.
- Led replatforming of tumor catalog platform (~$5M annual revenue system), owning delivery planning, requirements alignment, and cross-functional execution from development through release.
- Delivered AWS-backed scientific imaging platform supporting ~1M biological cell images annually across 8 European research sites.

- Reduced projected infrastructure costs through AWS architecture recommendations based on workload and usage analysis.

VMS BIOMARKETING, Remote September 2022 – March 2023
Project Manager

- Led requirements discovery and delivery of self-service client portal, producing UX flows, process diagrams, and Gherkin-based user stories with acceptance criteria.
- Influenced platform architecture (user schema, data flow); supported UAT and stakeholder signoff.

Walmart, Contract-Remote February 2022 – July 2022
Product Owner (Enterprise Search)

- Managed search relevance optimization across Walmart.com and mobile search, analyzing ranking anomalies, synonym logic, and product matching issues.
- Partnered with engineering teams to triage search defects and implement data-driven adjustments to ranking logic across web and mobile platforms.

Yonder (Company Closed), Hybrid April 2021– January 2022
Product Owner

- Owned executive-facing product backlog for customer-facing booking platform (~25K monthly users), aligning prioritization with funnel analytics and stakeholder goals.
- Identified flawed geographic ranking logic surfacing high-cost inventory first and partnered with engineering to improve search relevance for platform with ~25K monthly users.

Integritas Solutions March 2019-May 2020
Project Manager / Technical Program Manager

- Established enterprise project delivery framework including governance standards, kickoff processes, and execution workflows improving program delivery consistency.
- Facilitated distributed delivery across global teams, managing cross-team dependencies and increasing business sign-off efficiency by ~60%.

Clutch Analytics December 2017-March 2019
Business Analyst/Delivery Lead

- Led delivery of insurance rating platform supporting ~$25M policy volume with 15 vendor integrations including TransUnion and Black Knight.
- Managed state regulatory compliance program (100+ use cases) achieving top-tier completion performance and executive approval.
- Built automated regression test suite (~1,500 tests) improving release stability and reducing defects.
- Optimized API sequencing and integration logic, reducing costs and improving processing efficiency.
